

# PARENTAL CONTROLS

## IPHONE

Mobile phones can be helpful learning tools; however, they can also affect focus and achievement in school. In line with our current mobile phone policy, we are working in partnership with families to support young people in developing healthy habits around device use.

Parents and carers can use parental controls on family or shared mobile phone plans to help manage screen time, content, and access to information.

Scan the QR code for step-by-step guidance on how to enable parent controls on an apple device.
